Considered as the world's biggest independent broker, Man Group offers its clients Trading and Research capabilities in International Equities through its subsidiary, Man Securities.

The DMA electronic trading tools guarantee pure anonymity to our clients since Man Securities doesn't have a proprietary book. In addition, Man Securities doesn't offer Corporate Advisory which removes any possibility of Conflict of Interests with our clients.

Our mission is clear: we route our clients' orders directly into the Exchanges, we do not internalise them, we don't cross them, we don't manipulate them.

The execution is supported by an STP (Straight Through Processing) Settlement service which makes that from point of entry to settlement, no manual intervention is required, making the process smooth and cost efficient.

Man Securities offers high quality service together with very competitive prices which together make our Offer the best alternative to Electronic Global Execution.
